As a certified Adizes Associate, Mr. Jacinto Juarez focuses on presenting the Adizes Methodology and advising different profit and non-profit companies in an international setting. He has been working with the Adizes methodology since 2010.

Jacinto's broad experience, not only in the Adizes Methodology but also in Six Sigma and Lean, brings him a better and clearer criteria on helping clients constructively tackle their most significant issues.

Before joining Adizes, Jacinto was devoted to Continuous Improvement deployment strategies and assisting global companies to increase their productivity and efficiency on teamwork. Likewise, this same experience was acquired from countries such as Spain, Italy, Chile, Colombia, Brazil, Central and North America.

Jacinto has had relationships with Professional Chapters for Industrial Engineering and Manufacturing and currently is in touch with University fields providing insight on the subject of organizational transformation and continuous improvement.

He holds a degree in Industrial Engineering, and a Master's degree in Manufacturing Direction from Tecnológico de Monterrey. Currently, he is continuing his studies in transformational management and the Adizes Methodology through the Adizes Graduate School. Besides his work with Adizes, he has studied on Family fields.

Jacinto is married, has three sons and lives with his family in Monterrey, Mexico.
