Vladimirs started studying Adizes Methodology in 2017, and received his certification as an Associate in 2018.

He regularly delivers consulting and trainings on the Adizes Methodology to executives and senior management teams in Latvia.

For more than 10 Years, Vladimirs has been implementing Business Management Systems across Scandinavian and Baltic countries, Russia, and Ukraine.

While being in positions of lead Partner, Board Member, and Product Manager, he successfully improved service capacity, and introduced new major product to the Baltic market.

Vladimirs was introduced to Adizes Methodology in 2015, while leading a company through a change with their strategic supplier. The Adizes approach was very instrumental in dealing with this change. Vladimirs decided to dedicate himself full-time to the Adizes Methodology, as it fits well with his ultimate personal purpose.

Vladimirs graduated from the Faculty of Physics and Mathematics from the University of Latvia, with a thesis on Data Mining for Automated Decision Making in 2007.

He received his first level degree for his thesis on Synergy Between Different Software Development Methodologies.

Vladimirs is fluent in Russian, Latvian and English.
