Wilson Fukushima was first introduced to the Adizes methodology while working at Teledata, a Brazilian Consumer Credit company.

He applied some aspects of the methodology in Artificial Intelligence and Statistical Predictive Models Projects as applied to Credit Scoring and Fraud Detection areas. Since then he has conducted several projects using the methodology.

Wilson has extensive technical experience with Mainframe Software Companies such as Legent, Informix and Information Builders. He has conducted large scale IBM mainframe software projects in Data-ware housing, Business Intelligence and Versioning Control for the Banking and the Telecommunications Industry in Brazil.

Wilson holds a Production Engineering degree from Escola Politécnica da Universidade de São Paulo, Brazil with special courses in Operations Research and Statistics. Wilson is certified in Adizes Phases I,II and III and Spiral Dynamics Level 1 and 2.

He is based in São Paulo, Brazil.
